

Introduction

A safe environment is prerequisite for healthy life and efforts are ongoing in nearly all countries of the world to make it achievable.

Pollution of the environment can take many forms. The air we breathe, the water we drink, the ground where we grow our food, and even the increasing noise we hear every day—all contribute to health problems and a lower quality of life.

The present day situation of atmospheric and water pollution and its transboundary spread in particular has become a significant issue of concern and discussion nationally and internationally. Although industrial and commercial development is essential for the growth and strengthening of a country, for the progress to be sustainable it must be ensured that these developmental efforts are not detrimental to the quality of the environment.

The vital issues of monitoring of environmental pollution, pollution source identification, pollution control strategies and waste management solutions need to be investigated and highlighted. These problems must be jointly addressed by the government, environmental activists, scientists and the citizens.

The aim of the seminar is to bring together scholars, scientists, students, health workers and environmental activists from all over Pakistan to focus on the severity of the problem, to investigate its root causes and discuss the remedial steps.

Topics of discussion will be devoted to:

- Monitoring of environmental contaminants

- Waste management, treatment and recycling
- Air and water quality modeling and engineering
- Environmental impact
 - Socio-economic
 - Public health
 - Ecosystems
 - Technological and industrial

Participation:

The seminar is open for executive managers, scientists, engineers and environmentalists from industrial, commercial and financial concerns, research institutes, universities, environmental protection and regulatory bodies, public health agencies and NGOs.

Experts:

National professionals and international experts are expected to deliver plenary lectures.

Collaborators:

- Pakistan Institute of Engineering and Applied Sciences (PIEAS)
- International Atomic Energy Agency (IAEA).
- International Union for Conservation of Nature (IUCN)
- Clean Air Initiative (CAI-Asia)

Deadline:

Submission of abstracts and preliminary Registration August 1st 2010

Registration fee Rs.2000/-
University students Rs.1000/-

Venue:

Pakistan Institute of Nuclear Science and Technology (PINSTECH) P. O. Nilore, Islamabad, Pakistan

Accommodation:

Accommodation will be arranged in hotels on request. Details and reservation forms will be sent on demand.

6th Executive Management Seminar

on

The Current Environmental Pollution Scenario of Pakistan; Findings and Remediation

October 27-29th, 2010
Islamabad, Pakistan
